Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 26, 2004 has been entered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The reasons cited by applicant for the allowance of claims 1, 5, 8, 9, 16 and 17 found in the communication received November 13, 2002 are incorporated herein as the reasons for allowance of these claims. As to claim 12, Rabenecker (GB 2339834) is the closest art of record and while it teaches the elements recited in this claim of "the clip is coupled to an object and having a segment which secures the object to an article worn by a person" (lines 1-3) and "the adapter coupled to the segment and positioned between the segment and the surface of the object" (lines 3-5) Rabenecker fails to teach placing an extending feature on the adapter that is centered along a width dimension on an interface surface of the adapter with the extending feature extending substantially the adapter length and "positioned within an aperture between a first edge and a second edge of the segment" (lines 8-9). While Zuckerman (US 5890634, figures 1-3, 6, 8) teaches the securement of an adapter by two extending features extending along its width and at the ends of the adapter, there is no suggestion to modify the device of Rabenecker to have the extending feature on the adapter centered along a width dimension on an interface surface of the adapter and extending substantially the adapter length.
